## **Tom Gruber Joins AeroGo as Director of Engineering**

**SEATTLE, WA — May 3, 2022** — Load movement systems manufacturer AeroGo announced today that Tom Gruber has joined the firm as the Director of Engineering. “Tom brings a wealth of experience managing complex projects from prototype to launch-phase and delivering breakthrough solutions to manufacturing and product design problems. He has a successful track record as an engineer and inventor in his own right,” stated John Massenburg, President.

Tom has primary responsibility to manage the project performance and delivery schedules of the engineering teams’ contribution to custom projects. As a member of the Senior Management Team he will also define and manage future design and implementation of efforts to improve operational efficiency across the company. Tom stated, "I look forward to working with the talented engineering team at AeroGo. Together we will continue our legacy of solution-based products that are at work every day in industries all over the world."

For more information on AeroGo and load movement systems, contact AeroGo at 1-800-426-4757 or visit <http://www.aerogo.com>.

Founded in 1967, AeroGo is the world leader in providing innovative load moving solutions for awkward, delicate or exceptionally heavy loads used in factories. Visit [www.aerogo.com](http://www.aerogo.com) for more information.
